September 19, 2017

To Parents or Guardians,

*Buenas yan Håfa Adai!* The University of Guam School of Nursing and Health Science invites you to participate in the Pacific Islands Cohort on Cardiometabolic Health, also known as PICCAH.

The purpose of this research project is to collect health information to better understand cardiometabolic diseases such as diabetes and heart disease in our region. The first phase of the study is being done in Guam, and if successful, it will be expanded to other Pacific Islands. Parents with children born in Guam between January 1, 2010 and December 31, 2014 are invited to participate.

If you agree to participate, your and your child’s names will be included in a list of eligible participants. The PICCAH research team will randomly select 500 children and their parents from the list. Participation in this study is voluntary. Compensation in the form of gift certificates will be provided for your and your child’s time in the study.

If you wish to be included in our list of eligible participants, please contact the PICCAH research staff at (671) 686-3697 / 3426. You may also contact our team if you have any questions.

Si Yu’os Ma’âse,

*Yvette C. Paulino*

Yvette C. Paulino, PhD, CPH
Principal Investigator, PICCAH
Associate Professor, University of Guam
Participants Needed

Call the PICCAH staff to see how you can join!

If your child was born between 2010 and 2014 you may be eligible to participate in the Pacific Islands Cohort on Cardiometabolic Health

Please call or text 686-3426 / 3697 or email PICCAH@triton.uog.edu
